NurseTim[®]
INCORPORATED

In 2003 NurseTim[®], Inc. was founded by Dr. Tim Bristol with one goal – to be a resource for nurse educators and provide high quality faculty development solutions that are accessible to all programs.

As NurseTim[®] continued to grow, so did our passion to see not only faculty succeed, but students as well. We want students to not only be successful in the classroom, but on NCLEX[®] and, most importantly, in practice. In 2016, NurseThink[®], a brand of NurseTim[®], was born.

The graphic features a dark blue background with a subtle grid pattern. In the center is a large, faint lightbulb shape. Inside the lightbulb is a white stethoscope. Flanking the lightbulb are two yellow ECG (heart rate) lines. The text "NurseThink®" is in a bold, yellow, sans-serif font, and "NCLEX® Vision" is in a bold, white, sans-serif font, both centered over the lightbulb.

NurseThink® NCLEX® Vision

FACULTY VISION

Faculty success is all about seeing students grow into professionals that make a difference in healthcare. Our vision is to stand next to faculty every step of the way. We show faculty how to use the NCLEX® test plan at every level of the nursing curriculum to create learning experiences that are meaningful and effective. Whether novice educator or experienced administrator, our team is there every step of the way.

STUDENT VISION

Students need to see reality so that they know they are focusing on the most important content and concepts. We help students save time studying by taking them to clinical in every Clinical Judgment workshop, NCLEX® ReView, and coaching experience. Our vision is that students will be given the power to take ownership of their own learning by making their class/lab/sim time a clinical experience.

Clinical Judgment Exams: Retention & Readiness

These pre-developed exams have a Clinical Judgment focus that is essential to your program and NCLEX® Readiness. Created by our team of testing experts and powered by ExamSoft®, your program will have reliable data. Integrated across the curriculum, faculty and students can make focused decisions for remediation, learning, and readiness for practice. Faculty and students use Strengths and Opportunities reports to adjust lesson plans, personalize study time, and focus simulation/lab/clinical learning experiences.

- ✓ Clinical Judgment Testing, Assessment & Feedback
- ✓ Highest Quality Exams You Can Trust
- ✓ Includes National Benchmarks and Build Your Own
- ✓ Remediation & Next Gen NCLEX® Readiness

CJSim™ Next Gen Quizzing Tool

This innovative new quizzing tool provides students with the opportunity to build Clinical Judgment skills to both improve client care and promote NCLEX® success. Over 2700 Next Gen Questions and 900 Interactive EHRs representing a variety of nursing care units allow students to ‘provide care’ in a Next Gen client situation. Built on an interactive electronic health record (EHR) framework, the CJSim™ platform provides real-time feedback with rationales, offers clinically-relevant discussion questions, and places students at the “bedside/client-side” while making critical client care decisions. CJSim™ may be used:

- ✓ To reinforce class topics and take students to clinical in the classroom
- ✓ As class or clinical preparation assignments
- ✓ During post-conference or clinical “down-time” to broaden client experiences in a clinical environment and foster problem-solving skills
- ✓ To augment live simulations and enhance sim/lab learning through compare/contrast/Next Gen Quizzing
- ✓ Independently by students as they develop Clinical Judgment and test-taking skills

NCLEX®

PreView + ReView + Mentoring

The PreView helps students in the first year of their program develop habits of studying that promote Clinical Judgment.

The ReView is an NCLEX®-based clinical experience whereby final-semester students learn how to synthesize key concepts to provide patient care.

With the NurseThink® PreView+ReView+Mentoring, schools can choose to add on 6 weeks of Live Video Mentoring for students.

- ✓ Clinical Judgment Primer for Every Student
- ✓ Clinical-Based NCLEX® PreView+ReView+Mentoring
- ✓ All students will learn how to learn clinically

Our team of specialists has helped thousands of faculty and students change learning and preparation for NCLEX®.

- ✓ Improve Ability to Take NCLEX®-Related Test Items
- ✓ Clinical Judgment in Every Activity
- ✓ Save Time Studying in Every Class
- ✓ Students Learn How to Learn by Discovering What They Don't Know

Through conceptual and constructivist learning, students develop prioritization and Clinical Judgment habits while our team prepares them for the Next Gen NCLEX®.

Use as a stand-alone program or in conjunction with other NCLEX® review programs already in use at your school.

Multiple Packages for any Budget

One or Two Days On-Site or Online

- ✓ Weekly Live Virtual Video Mentor
- ✓ NurseThink® NoteBook
- ✓ NurseThink® NCLEX-RN® Conceptual Review Guide
- ✓ NurseThink® NCLEX-PN® Conceptual Review Guide

We conduct an analysis of your student cohort data and curricular outcomes to create a program tailored to your needs.
